

DAISEIKAI

More than an air conditioner

SKVR

4.18 EER

Toshiba experts reached perfection

The Daiseikai provides top performance and active air purification.

With its 4.18 EER, it brings high energy savings.

Now, with the new 5 kW and 6 kW sizes, the range is extended and can meet any requirement.

PURE AIR, 10 TIMES FASTER!

Plasma Air Purifier

It absorbs and eliminates particle pollutants such as dust, pollen and viruses.

Air ioniser

Generating 1 million negative ions for every square centimetre of air, it creates a pleasant sensation like that found in a forest or in the mountains.

Anti-Mould Pre-Filter

Combination between Coffee Bean Extract, Vitamin C and Super Zeolite filters, it works as an Anti Oxidant and Deodoriser.

The self-cleaning operation is designed to inhibit the growth of mould inside the air conditioner. This advanced system reduces moisture in the coils, to avoid proliferation of bacteria.

Low energy consumption, with 4.18 EER
 High efficiency, thanks to the DC Hybrid Inverter compressor
 Fast active filtration and purification
 Super silent

The benefits of Inverter technology

DC Hybrid Inverter technology saves you power and reduces energy costs (especially during off-peak times), it also helps reach your desired set temperature as fast as possible.

In addition, the super quiet outdoor unit operation makes the system very unobtrusive, ensuring total comfort.

* measured at 2.5 m distance, at low speed.

Personalised comfort

Toshiba has created useful new functions to meet the most demanding needs:

One Touch Personal Comfort: with this function, you don't need to select multiple settings.

One Touch Preset: you can memorise your preferred operating mode, temperature, timer, louver, fan speed and hi-power settings and with the touch of a button restore them at any time.

Quiet function: the indoor unit will operate at the lowest noise level – it shifts to super-low speed, reducing the sound level by a further 3 dB(A).

Discreet and stylish unit

The Daiseikai is compact and elegant: its modern design is original and hi-tech. Its silver and white panel make it easy to integrate into any room interior and differentiate this model from any others.

In addition, a white panel is also available to meet a variety of requirements (for 10/13/16 SKVR).

How effective is Daiseikai Plasma Air Purifier?

Daiseikai Plasma Air Purifier can collect tiny particles as small as 0.0001 micro metre.

Does the Daiseikai Plasma Air Purifier work in the entire room?

Yes. The Plasma Air Purifier can collect house dust in a room up to 21 m² within 30 minutes.

Does the Plasma Air Purifier increase the electricity consumption of the unit? The Plasma Air Purifier consumes a very small amount of electricity.

The additional cost per month is equivalent to the cost of a can of Cola .

* STUDY CONDITION:

8 hours in an office of 23 sqm, closed doors and windows, 3 persons present.
